Learning

Will the learning of the future take place in labs? Can experimental, **explorative learning** with experts and peers facilitate innovative forms of teaching and learning? What role does **digitality play**, and what artistic and design-oriented approaches are we developing in labs? And how can we integrate these methods as small interventions in teaching practice or use them as an entire teaching unit? We will explore these questions analytically and playfully at the **LaborDigital** conference.

The conference is organised by the E-Learning, Dossier Learning & Teaching of the ZHdK and is part of the „**Experimental Learning Labs**“ of ELLA. ella.zhdk.ch Programme and registration: link.zhdk.ch/digiLAB
