STAKEHOLDERS MAP

Core team

Full time on the project/team (e.g., PMs, engineers, designers)

Involved

Regularly providing input or helping to move work forward, but this project is not their sole focus

Informed

Wants to stay up to date and will provide feedback/input when necessary

RETO, 29

Bio:

Reto is a 29 year old frontliner working with complex machinery. He is highly skilled and tech savvy.

Behaviours:

He uses Andoid and windows and puts function above form. Looks for the most cost effective solutions to his problems

Goals:

Fix problems as fast as possible.

Pain points:

Communication issues with existing methods (microsoft teams, tablet, phone), long waiting times

Personality:

Motivation:

Communication issues with existing methods (microsoft teams, tablet, phone), long waiting times

Bio:

Ivan is a 36 years old expert working with complex machinery and is the one costumers contact if they have unexpected problems with their machines. He has a lot of experience and people rely daily on his expertise

IVAN, 36

Behaviours:

He is old school but ready to adopt to new technologies. He is pragmatic, logical and tech savvy

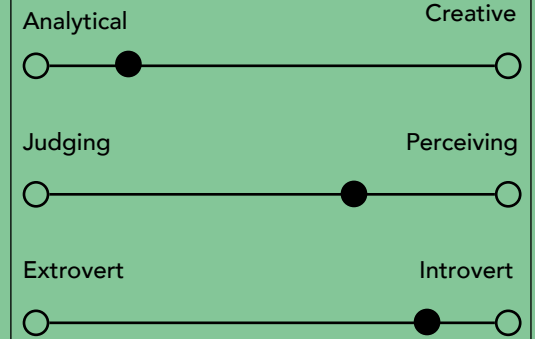

Goals:

Educate and guide costumers.

Pain points:

Communication issues with existing methods (microsoft teams, tablet, phone). Many costumers to attend

Personality:

Motivation:

Communication issues with existing methods (microsoft teams, tablet, phone), long waiting times

**Bio:**

Eduardo is a 34 year old Manager that has to work with many different parties. He has a lot of pressure and needs to have an overview of everything going on with a project

EDUARDO, 36

Behaviours:

His main working tool is his iphone and email. Usually stressed and loves coffee

Goals:

Independence and self sufficient of team members, looks for the most efficient workflow

Pain points:

Concerned with time and cost

Personality:**Motivation:**

Communication issues with existing methods (microsoft teams, tablet, phone), long waiting times

No 3

AZIZA, 43

Bio:

Aziza, 43
Qualification Engineer
Works in the a pharmaceutical company that manufactures equipment for sale in all countries of the world.

Her responsibility is to show customers from all over the world their product and check the state of the product

Behaviours:

She uses her Phone and Tablet a lot at work for documentation and communication with clients.
She is open to new technologies.
She tried working with AR glasses

Goals:

To make the process of introduction of customer to a product easier, less expensive, and more intuitive while they are in another country.

Pain points:

Communication issues with existing methods.
Hard to built trust and communication on distance.
When wearing AR glasses for a few hours she get headaches because of weight

Personality:

Motivation:

Make the process faster, cheaper, more ecologically-friendly

YASH, 32

Bio:

Yash is an Ambulance paramedic. He works in a medical team who arrives by ambulance to assess the patient medical condition and treat him before taking him to the hospital. They manage the treatment on the way to the hospital until a patient is in the care of the emergency department.

He does:

- provide advanced life support
- perform clinical procedures
- administer drugs
- decide which hospital or medical facility is the most appropriate for their patient.

Behaviours:

He is always collected and reserved. By reflex, at any moment he is ready to quickly respond to an emergency. Very empathic. It is hard to endure the death of patients.

Goals:

He noticed that in some situations ambulance cannot do much and all the situation depends on people around a patient. He would like to be able to help on a distance.

Pain points:

- Communication issues
- Patients/people around cannot describe the emergency situation clearly
- Trust issues (that he understands them correctly)

Personality:

Motivation:

- Reduce the number of situations where people are left alone to face an emergency situation
- To remove the feeling of helplessness
- Provide people with a feeling of reliance

ARMINE, 48

Bio:

Armine works as a technical engineer. Armine has over 30 years of experience. She works on development of a new equipment/ machines. She always tries to find ways to make a process smoother and faster. Though safety is her always number one priority.

She often collaborates with engineers from other departments who are located worldwide to work on a

Behaviours:

Usually, she thinks that to get work done she has to do it herself. She has a hard time delegating tasks or sharing responsibility.

She welcomes new technologies but prefers only necessary gadgets.

In her opinion technologies should be "invisible" in use. She needs it to only assist her actions.

Goals:

An easy and trustworthy workflow with colleagues from abroad

Make it easy to brainstorm together

More intuitive way of communication

Pain points:

Hard to collaborate when partners all located worldwide

Hard to explain the design ideas

Personality:

Motivation:

More intuitive way of communication/collaboration

SILVIA, 37

Bio:

Silvia (37), working as an experienced Agricultural Engineer. She works on field and is involved in waste-to-energy projects and carbon sequestration.

Behaviours:

She uses an android tablet and is well organised. Works on field or from the office.
She documents everything and is tedious.

Goals:

Prepare and present technical reports, meet with clients, and communicate technical concepts/ machinery to internal and external stakeholders.

Pain points:

Having all her tasks incorporated, many different fields and communication programs being involved.

Personality:

Motivation:

Improvement of farming equipment and machinery, hopes to get easier solutions for problem solving.

EMMY, 23

Bio:

Emmy is 23 and works as a junior Mechanical Engineer in hydroelectric facilities.

Behaviours:

Is adaptable and comfortable with using new technologies. She works closely with her supervisor, helps a lot with tech gadgets, and is able to bring new ideas to the table.

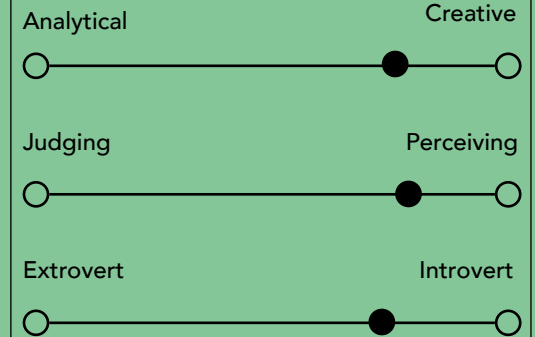

Goals:

Learning and become more confident in her field.

Pain points:

Prefers to find solutions on her own and wants more independency. Worries to get nervous using AR.

Personality:

Motivation:

Being

**Bio:**

Aparna is 49 and a Consultant for Packaging Professionals. She is an expert in cosmetics area.

APARNA, 49

Behaviours:

She uses Apple products (iPhone and tablet) and windows based computers. Technically fit, has a firm tone and prefers saying things once.

Goals:

A seamless workflow where everyone knows their position and task.

Pain points:

Believes that on sight customer service is essential for trust and prefers her experts doing the job. What happens if something breaks, who needs to pay?

Personality:**Motivation:**

Future orientated, low-cost, efficiency

**Bio:**

Benito is a 46 year old customer supporter. He works remote by giving instructions to engineers through call (voice or video).

BENITO, 46

Behaviours:

He is very calm in his field of work. He has to remain calm to prevent hysterical behaviour on the engineers site.

Goals:

Detecting problems through video call

Pain points:

Communication issues due to bad connection, language barrier, misunderstandings

Personality:**Motivation:**

He likes the idea of seeing through the eyes of the engineer on site but is afraid that working with AR/VR glasses causes more issues

MONIKA, 58

Bio:

Monika is a 58 year old technical engineer specialised in heavy machinery. Has been working in this field for more than 25 years. Generally never had to use the AR/VR glasses, since she came across all possible issues.

Behaviours:

She is very strategic when facing an issue with a machine. She goes through the manual step-by-step.

Goals:

Happy costumers, flawlessly working machines

Pain points:

Costumers try to fix the problem themselves and make it worse.
Missing items.

Personality:

Motivation:

She doesn't like the futuristic technology and thinks the relationship with the support people is on the line.

DEVYANI, 31

Bio:

Devyani is a 31 year old manager who just recently restructured her company by getting more energy efficient machines from abroad.

Behaviours:

She's very creative and wants to try different ways of running her business. Due to recent occurrences, she decided to swap all machines.

Goals:

Keep the same amount of output with less energy waste.

Pain points:

If a machine breaks down, it takes a long time for a specialist to get in touch or fix the issue. Loss of income.

Personality:

Motivation:

She's keen to try out the new possibilities that come with the glasses in order to minimise her main painpoints.

JIM, 43

Bio:

Jim is a 43 years frontline engineer who works at a production site. He has never used AR Glasses before and is only familiar with normal digital devices

Behaviours:

Jim just wants to solve the problem as fast as possible. He has no interest in looking through the whole documentation and figureout the problem by himself

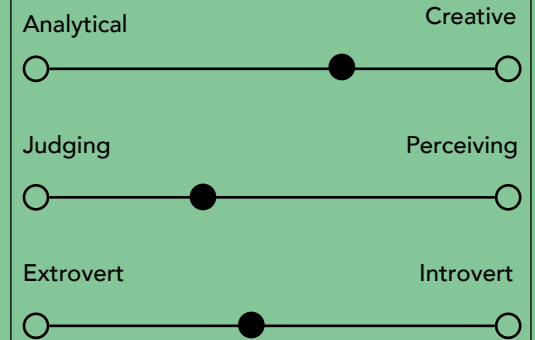

Goals:

The goal is primarily to fix the problem as easily as possible. He wants to understand where which parts have to be dismantled, replaced, etc.

Pain points:

Until now all the communication was over Microsoft Teams. He had to look at the tablet and the communication was very slow.

Personality:

Jim really knows the machine he works at. There are some small parts and sensors though, that he doesn't really know. He doesn't really care how, but he just want's that everything works. He isn't particularly interested in AR, as the solutions worked so far.

Motivation:

Easier use of a display as reference. Better assisted instructions while repair.

THOMAS, 39

No 14

Interaction Design I HS2022

Bio:

Kevin is a field engineer. He chose this job because he likes to work with his hands and in the field, but is also really interested in the theoretical and technical challenges of the engineering industry.

Behaviours:

Kevin is excited to solve problems and would rather fix everything himself. If he isn't sure if the people on site are able to fix the problem, he rather gathers a team and travels to the site.

Goals:

His goal is to fix the problem and looks for other maintenance issues. One visit should suffice for a longer time.

Pain points:

In a lot of situations he doesn't really understand what the problem is because the descriptions aren't very precise

Personality:

Open person who loves to meet new people and new cultures. He also really likes his job because of the days off while traveling.

Motivation:

Not a lot of interest in the AR Glasses other than being able to recognize the problem better. He wouldn't want that every problem is being solved with the glasses, because that would take away his favorite part of the job and he would just sit at his desk all day long.

THOMAS, 39

Bio:

Thomas is the manager of local production site in India. He is responsible that the production runs smooth and uninterrupted.

Behaviours:

Thomas is clearly interested that the problem is being solved as fast as possible as time and money is being saved. He doesn't really care what his workers like, he just wants the problem fixed.

Goals:

His goal is to run the production as smoothly as possible

Pain points:

If there are external experts involved there is a lot of time being lost in production, because flight hours can take up to 50 hours.

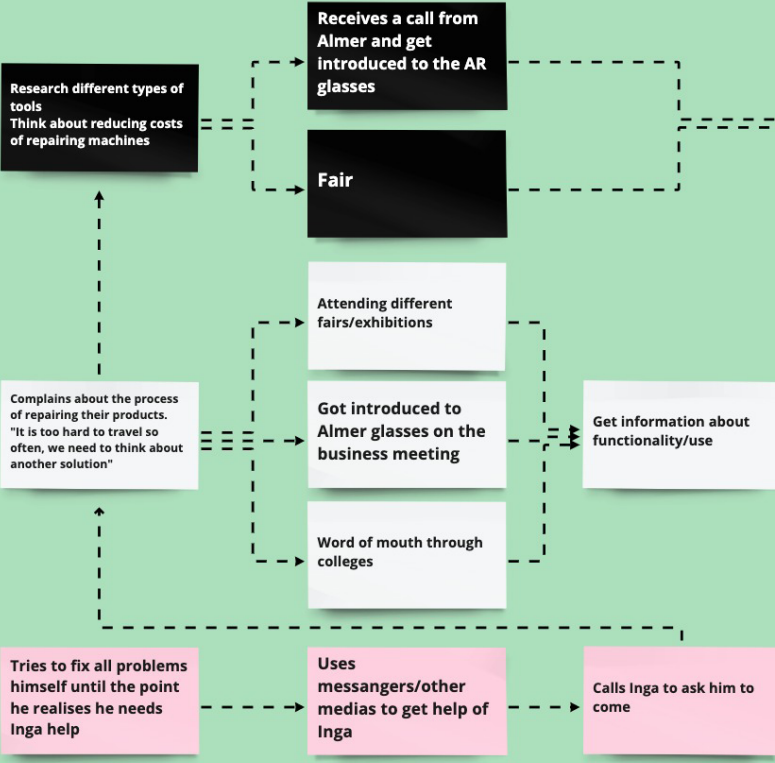

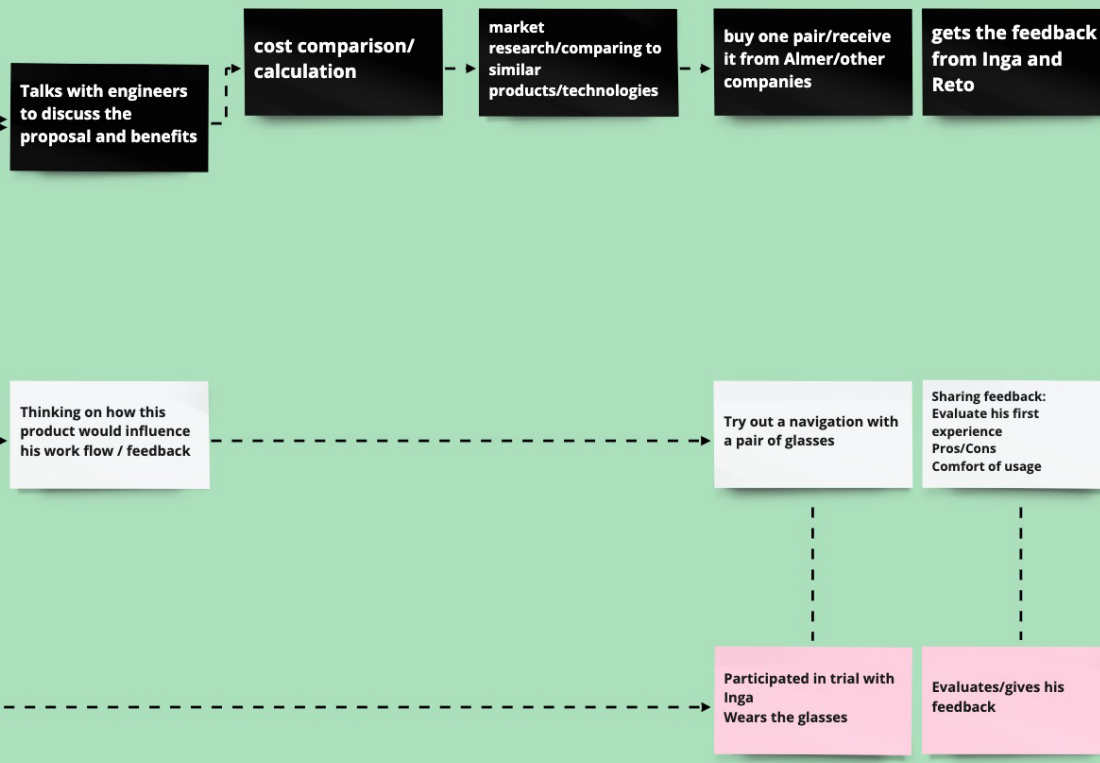

Personality:

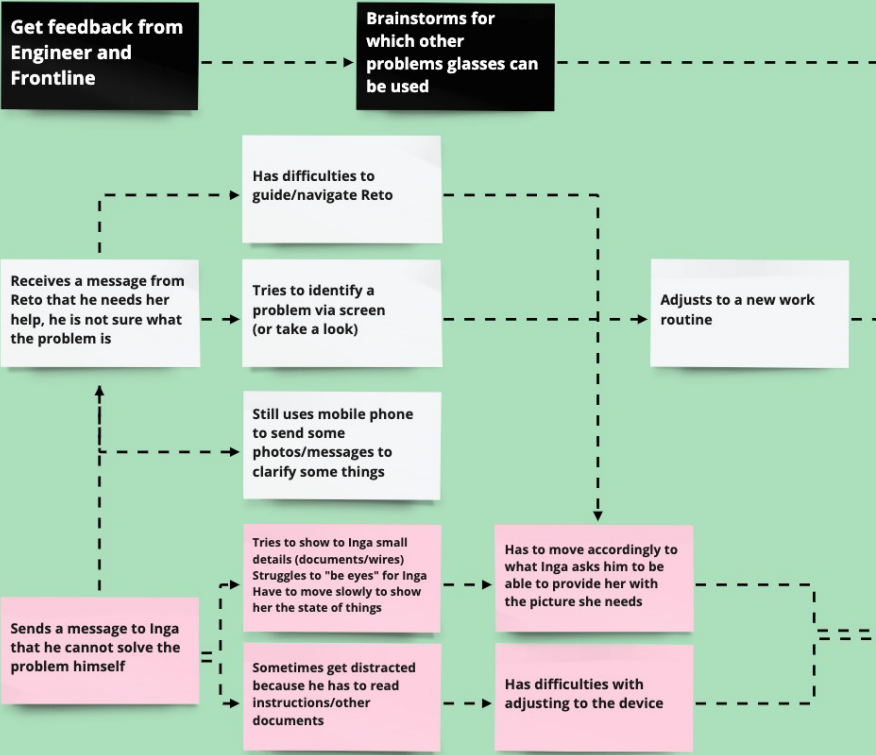

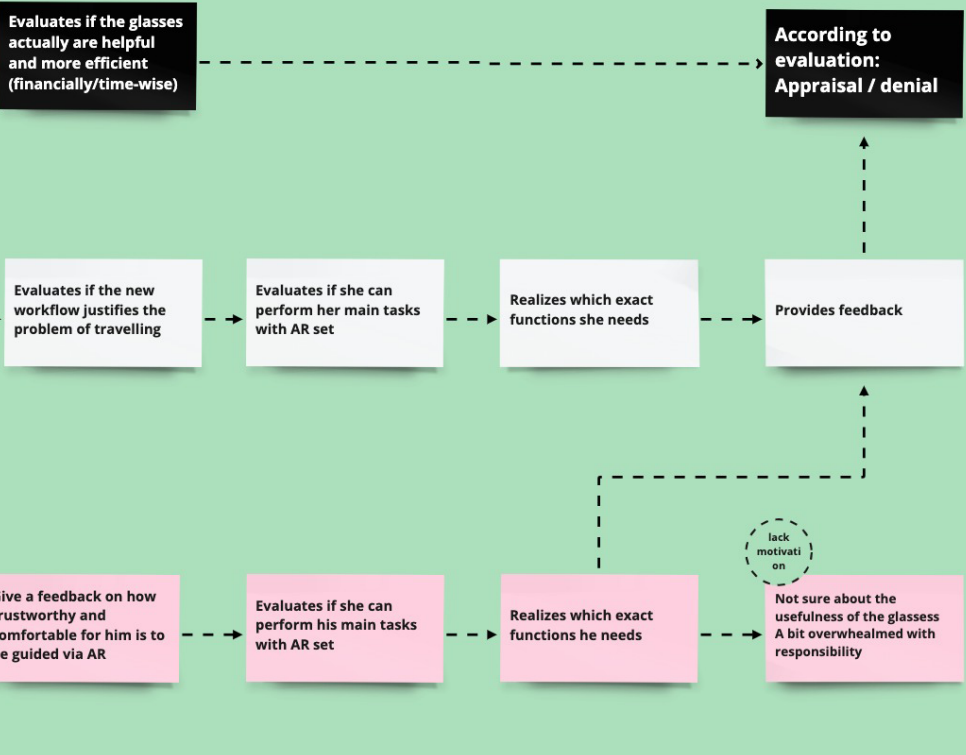

Bit of an asshole but succesful

Motivation:

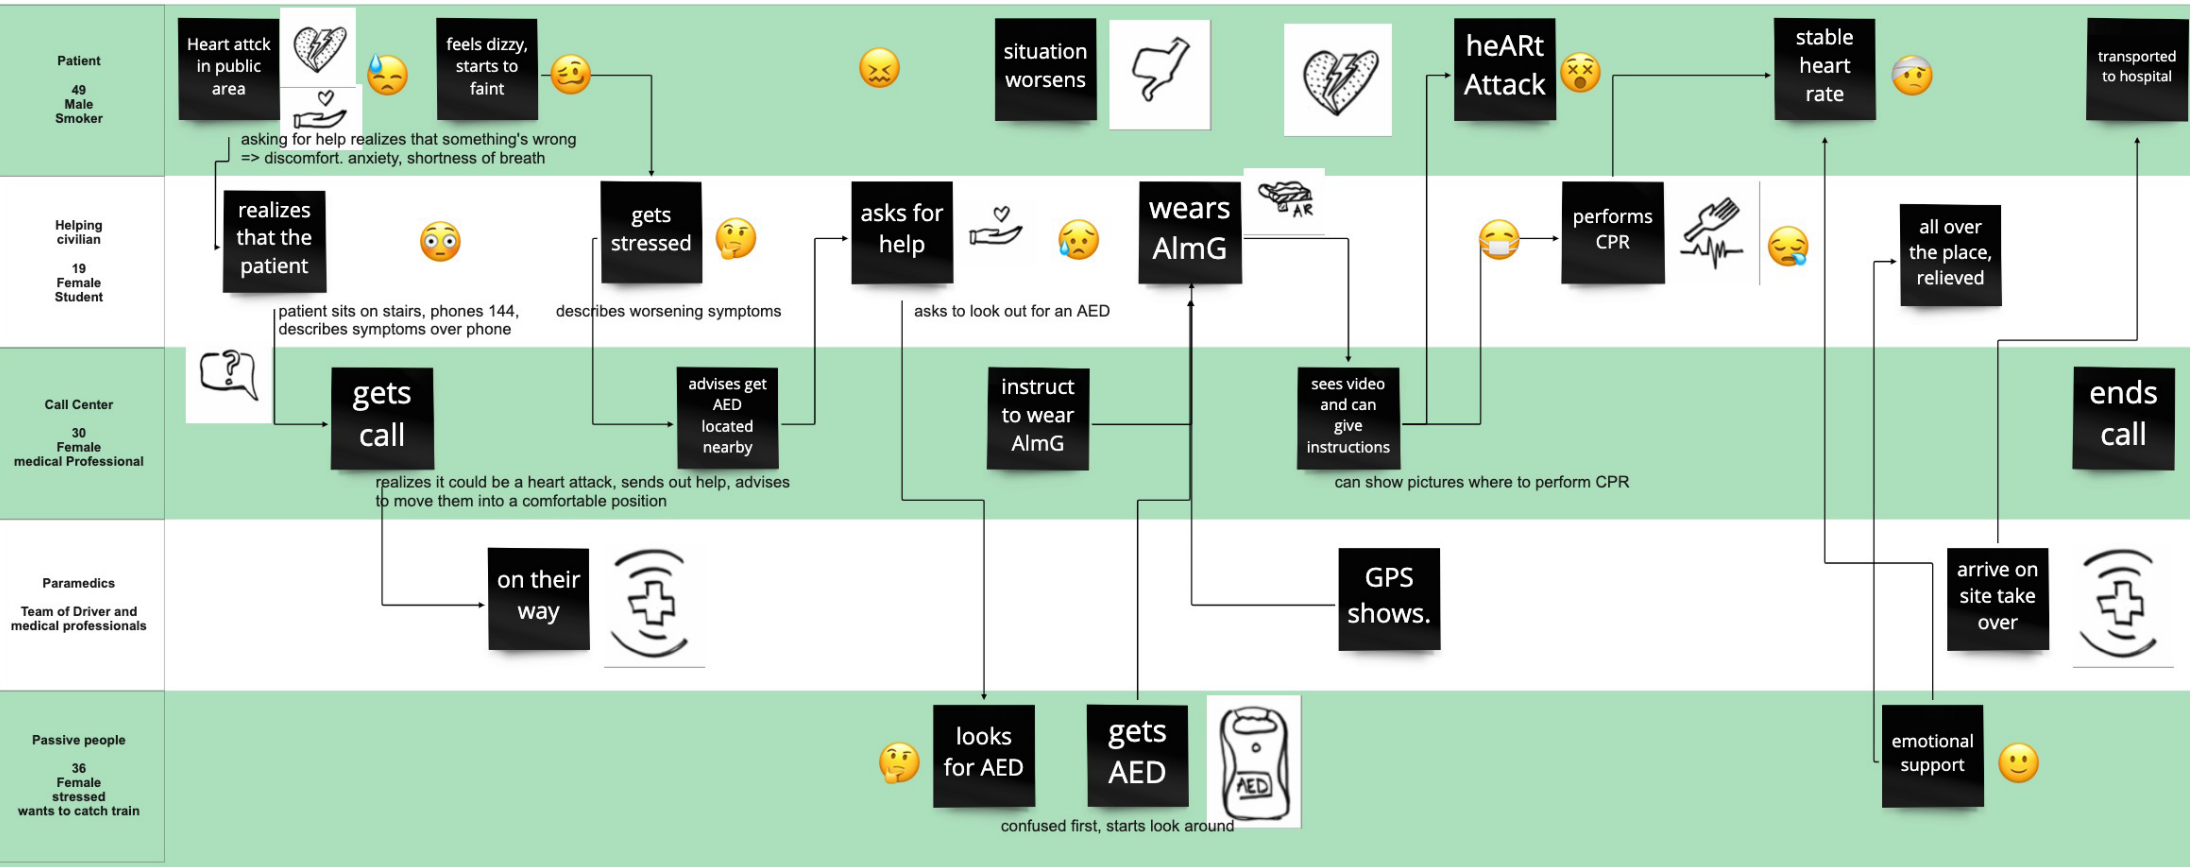

Maybe he gets promoted if his production site produces more than others.

| Stage | "Discovery" | "Commitment" |
|---|---|---|
| Actions Manager: Eduardo  Engineer: Inga  Frontliner: Reto  |  <p>The Discovery stage flowchart shows three parallel paths for Manager Eduardo, Engineer Inga, and Frontliner Reto. Eduardo's path involves researching tools and attending a fair. Inga's path involves complaining about repair costs and getting introduced to Almer glasses. Reto's path involves trying to fix problems himself and then asking Inga for help. All paths converge on getting information about the glasses' functionality and use.</p> |  <p>The Commitment stage flowchart shows a sequential process. Eduardo talks with engineers, leading to cost comparisons and market research. Inga thinks about how the product would influence her workflow, leading to a trial. Reto participates in the trial and provides feedback. The process ends with getting feedback from Inga and Reto.</p> |
| Pain Points | <ul style="list-style-type: none"> ● High cost of product maintenance / Complaints from the engineers ● Travel issues/ understanding that some issues will always need his guidance ● Tries to fix the problems he is not understanding in order to not ask Ivan to come / a lot of communication via messengers | <ul style="list-style-type: none"> ● Unclear benefit of usage of glasses / Cost / Uncertainty about what engineer really needs ● Trust issues to the AR process ● Discomfort of change of workflow / Miscommunication occurs |
| Touchpoint | <ul style="list-style-type: none"> ● Almer sales guy / conventions / Media ● Manager / Media / co workers ● Customer support of machines / Media | <ul style="list-style-type: none"> ● Engineers / calculation software / Internet / Almer ● Co workers / Manager / Frontline ● Customer support / Co workers |
| Opportunity | <p>Market to specific industry</p> <p>Aim specific needs and promote specific solutions</p> | <p>Clearly distinguish use case from other tools / glasses (pros/cons cost and features)</p> <p>Highlight that the functionality is enough for main tasks of an engineer (they don't need a set for 5000\$)</p> |

| Stage | "Use" | "Evaluation" |
|---|--|--|
| <p>Actions</p> <p>Manager: Eduardo </p> <p>Engineer: Inga </p> <p>Frontliner: Reto </p> |  <p>Get feedback from Engineer and Frontline → Brainstorms for which other problems glasses can be used</p> <p>Receives a message from Reto that he needs her help, he is not sure what the problem is → Has difficulties to guide/navigate Reto → Adjusts to a new work routine</p> <p>Still uses mobile phone to send some photos/messages to clarify some things → Adjusts to a new work routine</p> <p>Sends a message to Inga that he cannot solve the problem himself → Tries to show to Inga small details (documents/wires) → Struggles to "be eyes" for Inga → Have to move slowly to show her the state of things → Has to move accordingly to what Inga asks him to be able to provide her with the picture she needs → Adjusts to a new work routine</p> <p>Sometimes get distracted because he has to read instructions/other documents → Has difficulties with adjusting to the device → Adjusts to a new work routine</p> |  <p>Evaluates if the glasses actually are helpful and more efficient (financially/time-wise) → According to evaluation: Appraisal / denial</p> <p>Evaluates if the new workflow justifies the problem of travelling → Evaluates if she can perform her main tasks with AR set → Realizes which exact functions she needs → Provides feedback</p> <p>Give a feedback on how trustworthy and comfortable for him is to be guided via AR → Evaluates if she can perform his main tasks with AR set → Realizes which exact functions he needs → Not sure about the usefulness of the glasses. A bit overwhelmed with responsibility</p> <p>Not sure about the usefulness of the glasses. A bit overwhelmed with responsibility → Provides feedback</p> <p>lack motivation</p> |
| <p>Pain Points</p> <ul style="list-style-type: none"> ● Spend more time to introduce glasses / Not sure what is the best for his engineers / functions ● Difficulty to navigate Reto / see small details / shaking camera / miscommunication / need to use additional media / ● Miscommunication / difficulties to move in accordance what Inga said/ distraction | <ul style="list-style-type: none"> ● Hesitation about reliability of the technology / change of the company workflow ● Take care of safety / instructions on the other side / legal questions ● Finding a way with Reto of communication / navigation / collaboration ● Issues with trusting in the process / Overwhelm with calls, work (workers call more often) / not structured workflow / schedule | <ul style="list-style-type: none"> ● Engineers / Event-Organisations / Business-Events ● Personal surroundings (friends/family) / frontliners ● Other frontliners / engineers / personal surroundings (friends/family) |
| <p>Touchpoint</p> <ul style="list-style-type: none"> ● Engineers / other company managers ● Frontliners / other engineers / manager ● Engineers / co-workers | <ul style="list-style-type: none"> ● Engineers / Event-Organisations / Business-Events ● Personal surroundings (friends/family) / frontliners ● Other frontliners / engineers / personal surroundings (friends/family) | <ul style="list-style-type: none"> ● Engineers / Event-Organisations / Business-Events ● Personal surroundings (friends/family) / frontliners ● Other frontliners / engineers / personal surroundings (friends/family) |
| <p>Opportunity</p> <p>On-boarding of the glasses / proper introduction with manual</p> <p>Zoom / video-stabilizer</p> <p>better camera and low light performance / flashlight</p> | <p>Costumer support</p> | <p>Costumer support</p> |

VISION CASE: Emergency Assistance HB

Almer Glasses

- Need for improvement**
- Automatic Connectivity
 - Remote Start
 - Campaign to sensibilise

- Why?**
- Emotional support
 - Confidence in taking care
